

OptScale

The first open source FinOps and multi-cloud cost management solution

Optimize cloud and K8s costs and enhance IT infrastructure usage by implementing various scenarios and a FinOps strategy

OptScale is either in a form of open source code or as a SaaS solution, which gives complete visibility into the company multi-cloud infrastructure, identifies cost optimization scenarios and builds an ongoing FinOps process

Certified FinOps solution

OptScale helps companies implement FinOps principles by engaging engineering teams in cloud optimization and cost-saving processes. With OptScale team members share the ownership and responsibility for the cloud resources that they use.

Geo and network traffic cost map

OptScale enables to obtain the complete visualization of the company's spending on the resource usage in AWS, MS Azure or Alibaba Cloud regions and moreover shows accumulated expenses for paid network traffic between cloud regions and external services.

Cloud and K8s cost optimization

Comprehensive cost analytics enable companies to identify the best optimization scenarios for their cloud workloads and K8s clusters. OptScale offers hundreds of insightful optimization recommendations, from VM rightsizing to PaaS services and abandoned buckets.

TTLs, budget constraints & cost anomaly detection

OptScale continuously observes cloud cost and resource utilization to identify anomalies and spikes. The solution offers resource lifecycle management with TTL rules and over budget constraints, instantaneous alerts to resource owners to avoid budget overruns.

IT environment management

Track IT resource usage, book and release IT environments, simplify simultaneous shared access with OptScale. The solution helps easily identify R&D and test environment availability, and software versions deployed.

FinOps readiness and maturity assessment

Our solution enables companies to get an assessment of their current FinOps readiness and adoption state and provides a plethora of insightful recommendations on how to improve and accelerate FinOps implementation.

About us

hystax.com | info@hystax.com | +1 628 251 1280

Our mission is to help companies in building a culture of efficient IT workload usage by providing all necessary instruments for test environments and cloud cost management. We offer OptScale designed as a unique B2B SaaS platform, that optimizes IT infrastructure cost and helps to enable FinOps practices, delivers complete visibility and control over Kubernetes, AWS, Microsoft Azure and Alibaba costs. Medium-sized and enterprise companies gain up to 45% of cloud cost savings in the first three months of product usage. The company was founded in 2016 and has customers in 48 countries. The most remarkable customers are Airbus, Nokia, Burger King, Bentley, Nutanix.
